GLENDALE, AZ 85301

**** DETERMINATION OF NO HAZARD TO AIR NAVIGATION ****

The Federal Aviation Administration has completed an aeronautical study under the provisions of 49 U.S.C., Section 44718 and, if applicable, Title 14 of the Code of Federal Regulations, part 77, concerning:

Structure Type: STADIUM-MIDPOINT
Location: GLENDALE, AZ
Latitude: 33-31-42.5 NAD83
Longitude: 112-15-34.5
Heights: 198 feet above ground level (AGL)
1268 feet above mean sea level (AMSL)

This aeronautical study revealed that the structure does not exceed obstruction standards and would not be a hazard to air navigation provided the following condition(s), if any, is(are) met:

As a condition to this Determination, the structure should be marked and/or lighted in accordance with FAA Advisory Circular 70/7460-1 70/7460-1; Obstruction Marking and Lighting, red lights - Chapters 4, 5 (Red), & 12.

It is required that the enclosed FAA Form 7460-2, Notice of Actual Construction or Alteration, be completed and returned to this office any time the project is abandoned or:

At least 10 days prior to start of construction
(7460-2, Part I)

Within 5 days after the construction reaches its greatest height
(7460-2, Part II)

As a result of this structure being critical to flight safety, it is required that the FAA be kept apprised as to the status of the project. Failure to respond to periodic FAA inquiries could invalidate this determination.

See attachment for additional condition(s) or information.

The structure considered under this study lies in proximity to an airport and occupants may be subjected to noise from aircraft operating to and from the airport.

This determination expires on 2/26/2004 unless:

- (a) extended, revised or terminated by the issuing office.
- (b) the construction is subject to the licensing authority of the Federal Communications Commission (FCC) and an application for a construction permit has been filed, as required by the FCC, within 6 months of the date of this determination. In such case, the determination expires on the date prescribed by the FCC for completion of construction, or the date the FCC denies the application.

NOTE: REQUEST FOR EXTENSION OF THE EFFECTIVE PERIOD OF THIS DETERMINATION MUST BE POSTMARKED OR DELIVERED TO THIS OFFICE AT LEAST 15 DAYS PRIOR TO THE EXPIRATION DATE.

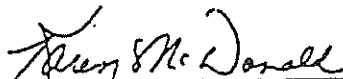

This determination is based, in part, on the foregoing description which includes specific coordinates, heights, frequency(ies) and power. Any changes in coordinates, heights, and frequencies or use of greater power will void this determination. Any future construction or alteration, including increase to heights, power, or the addition of other transmitters, requires separate notice to the FAA.

This determination does include temporary construction equipment such as cranes, derricks, etc., which may be used during actual construction of the structure. However, this equipment shall not exceed the overall heights as indicated above. Equipment which has a height greater than the studied structure requires separate notice to the FAA.

This determination concerns the effect of this structure on the safe and efficient use of navigable airspace by aircraft and does not relieve the sponsor of compliance responsibilities relating to any law, ordinance, or regulation of any Federal, State, or local government body.

A copy of this determination will be forwarded to the Federal Communications Commission if the structure is subject to their licensing authority.

If we can be of further assistance, please contact our office at (310)725-6557. On any future correspondence concerning this matter, please refer to Aeronautical Study Number 2002-AWP-2590-OE.

7460-2 Attached

Attachment

BASED ON A SIGNED REQUEST FROM THE CITY OF GLENDALE, THE AIRPORT AUTHORITY AND OWNER OF THE GLENDALE MUNICIPAL AIRPORT, THE FAA FLIGHT PROCEDURES OFFICE (FPO) HAS FORWARDED A REQUEST TO THEIR PROGRAM OFFICE TO ESTABLISH A WORK FILE TO RAISE THE AIRCRAFT CATEGORY C CIRCLING MINIMUMS AT GEU TO ACCOMMODATE THIS PROPOSED STRUCTURE. SPONSOR SHALL NOTIFY THE FPO WHEN CONSTRUCTION REACHES A HEIGHT OF 1240' AMSL SO THAT NOTAMS CAN BE ISSUED IF THE NEW MINIMUMS HAVE NOT BEEN PROCESSED AND PUBLISHED BY THAT TIME.
